

# Climate Positive Report (Dec 2020-21)

Envirogrid Developments is committed to taking climate action, they have measured and offset the emissions produced by their organisation

**Scope of action = Organisation**  
(includes Staff, energy, travel, waste, suppliers)

+

*That's enough emissions to fill 93 shipping containers with pollution*

*Over the lifetime of these trees that's approximately an extra 0.7 tCO<sub>2</sub> sequestered*

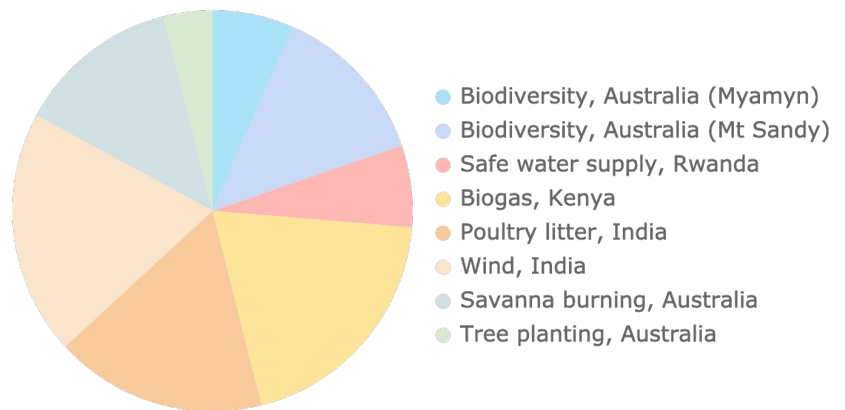

For every tonne of CO<sub>2</sub> you offset, we buy a carbon credit from one of our amazing projects. We also plant trees because trees are awesome and have long lasting environmental impact because they draw down CO<sub>2</sub> throughout their lifetime. The number below only represents the CO<sub>2</sub> removed from your trees **this year**.

## Where you reduced CO<sub>2</sub> pollution

### Funding by project location

### CO<sub>2</sub> volume offset per project

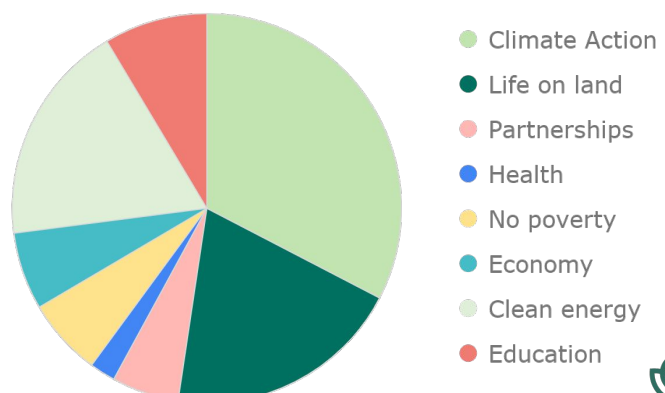

## Your broader sustainability impact

### United Nations Sustainable Development Goals

Our projects not only reduce CO<sub>2</sub> pollution but support multiple UN SDG's, which means that you are contributing to a more sustainable, healthy and equal future. Read more about the SDGs you are supporting [here](#)

### Contribution to SDGs

## Emissions Boundary

The 'climate positive' badge you earn depends on the boundary of emissions that you offset.

Emissions source:	Brand	Organisation	Workforce	Event
Product materials & manufacturing	✓			
Freight	✓			
Product packaging	✓			
Customer delivery	✓	✓		
Staff electricity usage	✓	✓	✓	
Building energy usage	(depends on calculation methodology)	(depends on calculation methodology)		✓
Staff / attendee travel & accommodation	✓	✓		✓
Staff commuting	✓	✓	✓	
Waste generated	✓	✓		✓
